Happening Now

The WDC Study Team is coordinating with agencies and other stakeholders to include more detail and incorporate the latest information into the EIS analysis. We are updating all of our traffic analyses based on the most current traffic projections. This includes a state and federal review of the design, safety, and operations of the alternatives, including the Glovers Lane and Shepard Lane interchanges. The overall length of the project is also being evaluated with the latest traffic model. The results of these analyses will be included in the Final EIS.

In response to state and federal agency comments on the Draft EIS, we are also further assessing wetlands and wildlife habitat, along with potential mitigation areas in order to provide more information in the Final EIS on environmental impacts and mitigation.

Looking Forward

As the study team concludes the transportation performance analysis and finalizes responses to comments received on the Draft EIS, we will update and finalize the chapters of the EIS accordingly. A Final EIS is expected to be released in Spring 2017, and a record of decision from the Federal Highway Administration is expected later that year.

Stay Involved and Informed

We invite you to keep learning about the EIS process and to be involved in the West Davis Corridor Study. Please visit www.udot.utah.gov/westdavis for all the latest updates, information and ways you can be involved.

For specific questions, or if you would like to speak to a study representative, please contact a member of the project team at 877-298-1991 or westdavis@utah.gov.
